| Type of muffler | LEGAMAX |
| Main material | SUS304 |
| Diameter of tip | φ115 |
| Diameter of pipe | φ60 |
| Remarks | |

- The development concept is "Stylish". We adapted the big size diameter tip for an impact that does not to be outdone by vehicle style.
- And 2 layers tip design make not just bigger diameter size but also has "Elegant" design.
- We have fixated on the straight structure. So we made it straight structure layout design, not the baffle structure to comp F-CON.
- And with the small silencer, it cool sound even for the straight structure.
